

Comfort Pad

Portable Heating Pad

Portable heating pad Lappo Comfort Pad

Purpose

- For local heating
- For comfortable outdoor rest
- To protect against colds

Advantages

Compact. Convenient to take with you on the road

Can be rolled and folded

Warm-up in 30 seconds

USB connection to different power sources: Power Bank, laptop, mobile phone

Heavy-duty, moisture-resistant pad material

5 hours of uninterrupted operation*

Uniform heating

Electrically safe product

Comfortable heating at temperatures down to minus 40 °C

* when using a battery with a capacity of 5000 mA • h and a current of 2 A

Design. Specifications.

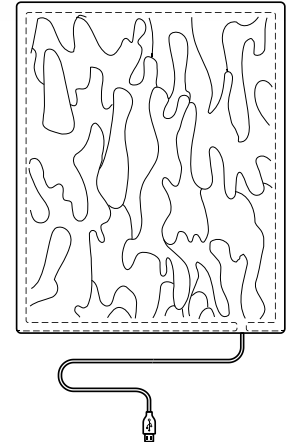

The Lappo design uses heating elements with multiple layers of insulation.

The outer layer is made of a dense, wear-resistant PVC material that is resistant to moisture.

Specifically calculated cable spacing and the configuration of the heating the element ensures fast and uniform heat dissipation over the entire surface.

Parameters	Lappo Comfort Pad
Dimensions, mm	320x260
Dimensions in package, mm	355x280
Weight, g	150
Rated power consumption, W	8,5
Pad surface temperature, °C	40
Rated voltage, V	5
Protection class / degree of protection	III / IP X4
USB-cable, cm	85
Operation time*	2 hours

* when using a battery with a capacity of 5000 mA • h and a current of 2 A

Production options. OEM capabilities

Branding options

Sew-on label with customer logo

Application of the customer's logo on the pad

*Making a pad in the customer's corporate colors **

* by agreement with the manufacturer

Manufacturer information

Lappo Comfort Pad is produced by OKB Gamma, the world high-tech leader in the development and production of all components of electrical heating systems for various industries.

It is part of SST Group, established in 1991 and occupying the second place in the world ranking of manufacturers of electrical heating systems.

Unique experience and industry expertise, own R&D and test centre, production area over 45,000 sq. m allow OKB Gamma to produce over 1000 types of cable and wire and other types of products for various industries.

Is in TOP-3 world manufacturers of electrical heating systems

Full production cycle of electrically conductive plastics and self-regulating cables

The quality control system of products is certified in accordance with the requirements of ISO 9001 since 2004

International certificate, including IECEx, ATEX, VDE

Products export to 60 countries
